Seasonal Schools in Signal Processing (S3P) Guidelines

Proposal Guidelines

S3P seasonal schools are typically either summer schools or winter schools, and are geared towards providing graduate students, early stage researchers, and practitioners with background on selected topics in signal processing. Organizers of Signal Processing Society workshops and conferences are encouraged to submit proposals for seasonal schools linked to their event.

The primary objective for creating a seasonal school program is membership development for students with interests in signal processing. Students are the future of our Society. It is essential that we provide special membership development opportunities for this important group of members.

Procedure

Proposers should submit their proposals by email to s3p-admin@ieee.org. Proposals should be 3-4 pages in length in 11 or 12 point font. Proposals should address the following points:

- 1. The proposed title should be formatted as follows, IEEE SPS [Season] School on [Topic], a description of the technical theme for the seasonal school, and an outline of the topics to be covered.
- 2. A specification up front about whether *regular sponsorship* (financial and technical) or just *technical co-sponsorship* by SPS is proposed. Under technical co-sponsorship, organizers are free to use the SPS Technical Co-Sponsorship logo nn their website promotional materials, but no financial support is provided by SPS.
- 3. A listing of key organizers, and description of their qualifications.
- 4. A description of the proposed venue, including the facilities available to host the event.
- 5. A listing of proposed lecturers and their qualifications, including information about which lecturers are confirmed (pending approval of the proposal), and which are candidates who have yet to be confirmed.
- 6. A description of the proposed membership development contribution of the seasonal school. What will be the contribution of the seasonal school to the students who attend, and to the IEEE Signal Processing Society at large? What special activities or initiatives will the organizers develop as part of the event to help enhance the impact? Organizers should describe a minimal set of lectures

Proposal Guidelines

they intend to propose to the <u>Resource Center Editorial Board</u> (http://www.signalprocessingsociety.org/publications-resources/sps-resource-center) for upload and possible plans to use the new <u>SigPort</u> online document archive and comment sharing SPS portal for their school.

- 7. A description of any travel grant program that will be included in the proposed seasonal school. The costs for providing these grants should be taken into account in the budget breakdown (see item 10).
- 8. Proposed dates. The suggested duration is five days (Monday through Friday of a given week).
- 9. A specification of the proposed registration fee structure. A significantly higher rate is suggested for non-SPS members. The following categories are suggested with examples of corresponding costs in terms of US dollars.
 - SPS student member (lowest rate) e.g., \$100 for the whole event.
 - Non-SPS student e.g., \$200 or \$250 for the whole event.
 - Non-student SPS member.
 - Non-student, Non-SPS member.

The non-student rates are oriented towards practitioners, and those rates can be significantly higher (e.g., \$500 for a single day or \$800 total as examples). For practitioners, a single-day rate is useful since some may have trouble leaving work for several consecutive days.

The specific dollar amounts provided here are only examples. Organizers should adjust the amounts based on local considerations, anticipated external support, etc. Even if enough support is available to cover student registration costs completely, some modest registration costs are suggested for students so that they and their advisors are "invested" in the program.

- 10. A detailed plan to record Seasonal School lectures and sessions, including budget considerations, vendors, and recording process. All recordings will be made available in the SPS Resource Center.
- 11. Provide a budget breakdown that shows estimated revenues (from registrations and sponsorship contributions), as well as costs. For a regular sponsorship proposal (see Item 2), an SPS contribution of up to \$5K US dollars can be included in the budget. For a successful white paper, the actual limit of SPS support will be determined by the Membership Board at the full proposal stage.

Proposal Guidelines

When preparing the budget, proposers are advised to *not* plan on having business class travel (use economy class) for speakers unless it can be supported directly from external (non SPS) funds. IEEE funds cannot be used to pay for business class travel.

The budget provided in the white paper should also address the following points:

- The proposed budget should include a 15% contingency to reduce the probability of a deficit. The organizers will be responsible for covering any losses; SPS will not assume such liability.
- What do the organizers plan to do with their share of any budget surplus, should one exist?
- Eventual organization connections should be highlighted with local IEEE SPS Chapters, as well as related involvement in the budget (e.g., local Chapter, contributions to the school, and plans for splitting any surplus).
- 12. For technical sponsorship proposals, no contribution will be provided, but a budget breakdown will have to be provided together with a mandatory commitment letter of the local IEEE SPS Chapter to actively cooperate in the School.
- 13. Information about low cost living arrangements available for students. What will be the cost to students for living arrangements? Is free dorm accommodation available for students? Approximately how many students can be accommodated under the available low cost or free housing arrangements?
- 14. Information about lunch arrangements. Will the event provide lunches (if so, it needs to be in the budget) or will there be low cost lunch facilities available? The envisioned lunch facilities and their estimated cost to students should be described.

Seasonal School Timeline

Winter Schools held	October 1 – March 31
Summer Schools held	April 1 – September 30

Proposal Guidelines

Proposal Timeline

- 1. Call for Proposals
 - a. Issued by Society
- 2. Proposals are due
- 3. Vetting and voting process underway for all submitted proposals
 - a. Season School Subcommittee reviews and recommendations
 - b. Membership Board reviews and approves
- 4. Final decisions are made
 - a. Seasonal School Subcommittee Chair will send decisions to submitted proposal teams
 - b. Seasonal School SPS Staff will send "Welcome Message" to accepted schools
