SPECIAL SESSIONS:

1a COMPUTATIONAL METHODS FOR MULTI-SENSOR RADAR – I

Organizers and Chairs: Prof. Fulvio Gini (University of Pisa, Italy)
Dr. Marco Martorella (University of Pisa, Italy)

Date: December 13, 2005
Room: Vallarta IV
Time: 11:20 – 13:00

1a.1 51-SS1-1 Cognitive Radar Networks ..............................1
Simon Haykin

1a.2 29-SS1-5 Multi-dimensional Aperture Design and Analysis for SAR using the Cramér-Rao Theorem .................................................4
Robert Linnehan, David Brady, John Schindler, Leonid Perlovsky, and Muralidhar Rangaswamy

1a.3 30-SS1-1 Structured Covariance Estimation and Radar Imaging with Sparse Linear Models .................................................................8
Daniel R. Fuhrmann

1a.4 31-SS1-2 Two-Set Expected-Likelihood GLRT Technique for Adaptive Detection ..................12
Yuri Abramovich and Nicholas Spencer
1b  COMPUTATIONAL METHODS FOR MULTI-SENSOR RADAR – II

Organizers and Chairs: Prof. Fulvio Gini (University of Pisa, Italy)
                  Dr. Marco Martorella (University of Pisa, Italy)

Date:  December 13, 2005
Room:  Vallarta IV
Time:  14:40 – 16:00

1b.1  32-SS1-5  Autonomous Intelligent Radar System (AIRS) for Multi-Sensor Radars..................16
       G. Capraro, W. Baldygo, R. Day, J. Perretta, and M. Wicks

1b.2  33-SS1-5  Target Height Estimation in an Emulated Bistatic Radar Via Interferometric
       Processing..................................................................................................................... 20
       James Palmer, John Homer, Marco Martorella, and Fabrizio Berizzi

1b.3  35-SS1-3  A Beamforming Approach to Stepped-Frequency Synthetic Aperture Through-
       Wall Radar Imaging..................................................................................................... 24
       Fauzia Ahmad, Moeness G. Amin, and Saleem A. Kassam

1b.4  36-SS1-4  A Method for Combining Focused Monostatic and Bistatic GPR to Reduce
       Multipath Effects ........................................................................................................ 28
       Ali Ashtari, Daniel Flores-Tapia, Gabriel Thomas, and Stephen Pistorius
1c COMPUTATIONAL METHODS FOR MULTI-SENSOR RADAR – III
Organizers and Chairs: Prof. Fulvio Gini (University of Pisa, Italy)
Dr. Marco Martorella (University of Pisa, Italy)
Date: December 13, 2005
Room: Vallarta IV
Time: 16:40 – 18:00

1c.1 37-SS1-2 Correlative Interferometric Imaging of Extended Objects for Near Field Arrays ..........32
Raghuveer Rao and Braham Himed

1c.2 38-SS1-5 Ultra Narrow Band Adaptive Tomographic Radar............................................................36
Michael C. Wicks, Braham Himed, L. Justin Bracken, Harry Bascom, and John Clancy

1c.3 49-SS1-1 Evolution of Radar Target Tracking Algorithms: A move towards Knowledge
Based Multi-Sensor Adaptive Processing .................................................................40
Jai Prakash Singh

1c.4 50-SS1-1 An algorithm for the neural fusion of IRST & Radar for Airborne Target
Detection......................................................................................................................44
Jai Prakash Singh
2 COOPERATIVE SENSOR NETWORKS

Organizers and Chairs: Prof. N. Lanneman (University of Notre-Dame, U.S.A.)
Date: December 13, 2005
Room: Ameca
Time: 11:20 – 13:00

2.1 39-SS2-3 Linear Complex-Filed Coding for Cooperative Networking ............................................48
Alejandro Ribeiro, Renqiu Wang, and Georgios B. Giannakis

2.2 40-SS2-1 Distributed Space-Time Block Coding for Cooperative Networks with Multiple-Antenna Nodes ........................................................................................................................................52
Simon Yiu, Robert Schober, and L. Lampe

2.3 41-SS2-2 Optimal Rate Allocation for the Vector Gaussian CEO Problem ............................................56
Jin-Jun Xiao and Zhi-Quan Luo

2.4 42-SS2-1 Cooperative Models for Synchronization, Scheduling and Transmission in Large Scale Sensor Networks: An Overview ........................................................................................................60
Anna Scaglione and Yao-Win Hong

2.5 43-SS2-2 A Two-Stage Fastmap-Mds Approach for Node Localization in Sensor Networks ........................................................................................................................................64
Georgios Latsoudas and Nicholas D. Sidiropoulos
3  COMPUTATIONAL TECHNIQUES IN FLEXIBLE CONTROL OF PHYSICAL STRUCTURES FOR PRECISE SENSOR DESIGN AND PERFORMANCE TESTING

Organizers and Chairs: Dr. Christian Constanda (University of Tulsa, U.S.A.)
Dr. Igor Chudinovich (University of Guanajuato, México)

Date: December 13, 2005
Room: Ameca
Time: 14:40 – 16:20

3.1 44-SS3-3 A Computational Multi-Kernel Approach to Multi-Sensor Processing Using Cross-Referencing (CREF) .................................................................68
William R. Case, Barbara S. Bertram, and John W. Hilgers

3.2 45-SS3-3 Dual Methods for Sensor Testing of Industrial Containers. I. The Classical Approach ..............................................................71
Igor Chudinovich, Christian Constanda and Alexander Koshchii

3.3 46-SS3-4 Dual Methods for Sensor Testing of Industrial Containers. II. A Nonclassical Approach ..............................................................74
Igor Chudinovich, Christian Constanda, Dale Doty and Alexander Koshchii

3.4 47-SS3-3 Integral Methods for Mechanical Sensor Design and Performance Testing in Plates with Transverse Shear Deformation and Transverse Normal Strain .............77
Radu Mitric, Peter Schiavone and Christian Constanda
4 MONTE CARLO BASED METHODS FOR SENSOR SIGNAL PROCESSING

Organizers and Chairs: Prof. Petar M. Djuric (Stony Brook University, U.S.A.)
Dr. Mónica F. Bugallo (Stony Brook University, U.S.A.)

Date: December 14, 2005
Room: Ameca
Time: 10:50 – 12:30

4.1 22-SS4-2 Bootstrap Based Nonparametric Curve and Confidence Band Estimates for Spectral Densities........................................................................................................81
Ramon F. Brich and Abdelhak M. Zoubir

4.2 52-SS4-3 Multiple Target Tracking with Constrained Motion using Particle Filtering Methods........................................................................................................85
I. Kyriakides, D. Morrell and A. Papandreou-Suppappola

4.3 53-SS4-2 Monte Carlo Algorithms for Tracking a Maneuvering Target using a Network of Mobile Sensors........................................................................................................89
Joaquin Miguez and Antonio Artés-Rodriguez

4.4 54-SS4-5 Multiple and Extended Object Tracking with Poisson Spatial Processes and Variable Rate Filters........................................................................................................93
Simon Godsill, Jack Li, and William Ng

4.5 55-SS4-3 Positioning a Time-Varying Number of Targets by a Wireless Sensor Network........97
Petar M. Djuric, Mónica F. Bugallo, and Jae-Chan Lim
## CONVEX OPTIMIZATION TECHNIQUES FOR BEAMFORMING AND MIMO SIGNAL PROCESSING

Organizers and Chairs: Dr. Sergiy Vorobyov (Darmstadt University of Technology, Germany)
Date: December 14, 2005
Room: Vallarta IV
Time: 10:50 – 12:30

6 MULTILINEAR METHODS
Organizers and Chairs: Prof. Lieven De Lathauwer (France)
Date: December 13, 2005
Room: Ameca
Time: 16:40 – 18:00

6.1 61-SS6-1 Warped Image Factor Analysis........................................................................................................121
Sungjin Hong

6.2 62-SS6-1 Parallel Factor Analysis by Means of Simultaneous Matrix Decompositions..............125
Lieven De Lathauwer

6.3 63-SS6-1 Singular Values and Eigenvalues of Tensors: A Variational Approach...............129
Lek-Heng Lim

6.4 64-SS6-2 Blind Identification of Under-Determined Mixtures Based on the Characteristic Function: Influence of the Knowledge of Source PDF’s .........................................................133
Myriam Rajih and Pierre Comon
REGULAR SESSIONS:

7 MULTI-ANTENNA, MULTI-USER, AND COOPERATIVE COMMUNICATIONS

Chair: Dr. Geert Leus (Delft University of Technology, The Netherlands)
Date: December 14, 2005
Room: Vallarta IV
Time: 14:00 – 16:00

7.1 03-SS0-2 Designing Unique Words for Reliable Channel Estimation in Multi-Antenna Block Transmission Systems .................................................................137
Justin Coon and Magnus Sandell

7.2 07-SS0-4 Turbo Space-time Receiver by Kurtosis Maximization for CCI/ISI Reduction in Cellular Wireless Communications ..............................................................141
Chun-Hsien Peng, Chia-Chin Lin, Tsung-Hui Chang and Chong-Yung Chi

7.3 13-SS0-3 A State-Space Approach to Robust Multiuser Detection .............................................145
Amr El-Keyi, Thia Kirubarajan and Alex B. Gershman

7.4 16-SS0-3 The Pairwise Error Probability and Precoder Design for Amplify-and-Forward Half-Duplex Cooperative System .................................................................149
Yanwu Ding, Jian-Kang Zhang and Kon. Max Wong

7.5 19-SS0-3 Precoder and decoder prediction in time-varying MIMO Channel ..............................153
Hung Tuan Nguyen, Geert Leus and Nadia Khaled

7.6 20-SS0-2 Soft Decode and Forward Improves Cooperative Communications ..........................157
Harold H. Sneessens and Luc Vandendorpe
| 8 | 02-SS0-2 | Relevant Opportunistic Information Extraction Scheduling in Heterogeneous Sensor Networks | 161 |
|    | Tauseef Gulrez, Subhash Challa, Tahir Yaqub, and Jay Katupitiya |
| 8.2 | 05-SS0-2 | Unified Bayesian-Experiment Design Regularization Technique for High-Resolution Reconstruction of the Remote Sensing Imagery | 165 |
|    | Yuriy V. Shkvarko and Iván E. Villalón-Turrubiates |
| 8.3 | 06-SS0-3 | Neural Networks Computational Technique for High-Resolution Remote Sensing Image Reconstruction with System Fusion | 169 |
|    | Yuriy V. Shkvarko, Jose L. Leyva-Montiel and Iván E. Villalón-Turrubiates |
| 8.4 | 65-SS0-3 | Recognition of Ultrasound Images using Wavelet Transform and Artificial Neural Networks | 173 |
|    | Cristina Juarez-Landin, Volodymyr Ponomaryov, and Jose L. Sanchez-Ramirez |
| 8.5 | 28-SS0-3 | Virtual Sensors for Dynamic Virtual Environments | 177 |
|    | H. Iván Piza, Félix F. Ramos, and Fabiel Zúñiga |
9.1 09-SS0-1 Reduced Complexity Blind Unitary Prewhitening with Application to Blind Source Separation
Sergiy A. Vorobyov

9.2 10-SS0-2 Modulated Lapped Transform Generalized Sidelobe Canceller
John P. Stralka and Trac D. Tran

9.3 21-SS0-2 Eigenmode SNR Increasing Method for ML Criterion-Based Space-Time Linear Precoder
Narieda and Katsumi Yamashita

9.4 24-SS0-2 Group-oriented Beamforming for Multi-stream Multicasting Based on Quality-of-Service Requirements
Yan Gao and Martin Schubert

9.5 15-SS0-1 Recognition of the Predetermined Random Signals Involving the Unknown Signals
Valery Mikhailovich Bezruk
10 DETECTION, CLASSIFICATION, AND RECOGNITION

Chair: Dr. Christoph F. Mecklenbrauker (Telecommunications Research Center Vienna, Austria)
Date: December 14, 2005
Room: Vallarta IV
Time: 16:20 – 18:20

10.1 04-SS0-3 Robust CFAR Detection in Clutter with Unknown Covariance Matrix .......................201
Victor Golikov, Olga Lebedeva and Andrés Castillejos

10.2 08-SS0-3 Multiple Target Recognition Based on Blind Source Separation and Missing Feature Theory ...............................................................205
Huang Qi, Xing Tao and Liu Hai Tao

10.3 23-SS0-4 Multiple Signal Detection Using the Benjamini-Hochberg Procedure ......................209
Pei-Jung Chung, Johann F. Böhme, Christoph F. Mecklenbräuker, and Alfred O. Hero

10.4 26-SS0-2 Combined Direction Finders of Point Noise Radiation Sources in AA Based on Adaptive Lattice Filters ..........................................................213
Mihail F. Bondarenko and David I. Lekhovitsky

10.5 27-SS0-2 Choice of a Learning Sample Size in Adaptive Detectors of Signals against the Background of Gaussian Interferences ...............................................217
Mihail F. Bondarenko and David I. Lekhovitsky
11 MULTICHANNEL SYSTEMS AND APPLICATIONS

Chair: Dr. David Gutiérrez (UNAM, Mexico)
Date: December 15, 2005
Room: Vallarta IV
Time: 11:30 – 13:10

11.1 11-SS0-3 Classification of Multichannel EEG Data using Length/Energy Transforms...............221
David Gutiérrez, Fabián García-Nocetti, and Julio Solano-González

11.2 12-SS0-2 Array Response Kernels for EEG/MEG in Single-Shell Ellipsoidal Geometry.............225
David Gutiérrez and Arye Nehorai

11.3 14-SS0-2 The Performance Analysis of EV-t method for Two-Dimensional Code Acquisition......................................................................................................................229
Rui Wu and Tapani Ristaniemi

11.4 17-SS0-3 Local Quaternion Weighted Difference Functions for Orientation Calibration on Electromagnetic Trackers .................................................................233
Víctor Manuel Ochoa Mayorga, Pierre Boulanger, and Manuel García

INVITED SPEAKERS:

Helmut Boelcskei, ETH Zurich, Switzerland
INTERPOLATION-BASED MIMO-OFDM RECEIVERS..................................................No Paper Provided

Yonina Eldar, Technion, Israel
UNIFORMLY IMPROVING THE CRAMER-RAO BOUND AND MAXIMUM-LIKELIHOOD ESTIMATION .................................................................No Paper Provided

Simon Godsill, University of Cambridge, UK
NETWORK-ENABLED DETECTION AND TRACKING - MULTIPLE SENSORS, EVASIVE TARGETS, PARTICLES AND POINT PROCESSES.................................No Paper Provided

Martin Haardt, Ilmenau University of Technology, Germany
EFFICIENT MULTI-USER MIMO DOWNLINK PRECODING AND SCHEDULING...............237
Martin Haardt, Veljko Stankovic, and Giovanni Del Galdo

Zhi-Quan (Tom) Luo, University of Minnesota, USA
PROBABILISTIC ANALYSIS OF SDP RELAXATION FOR BINARY QUADRATIC MINIMIZATION WITH APPLICATION TO WIRELESS COMMUNICATION ......No Paper Provided

Pierre Comon, University of Nice Sophia-Antipolis (UNSA), France
ALGEBRAIC BLIND TECHNIQUES ............................................................................No Paper Provided
