

Seasonal Schools in Signal Processing

Seasonal Schools in Signal Processing

Winter 2019-2020 proposals being accepted now!

Are you looking to energize signal processing students, early stage researchers, and industry practitioners in your area? Consider hosting a Seasonal School for young engineers near you!

Seasonal Schools are interactive events designed to provide attendees with specialized background in select signal processing topics. Professors and established practitioners work closely with attendees in hands-on tutorials and applications, building meaningful collaborative relationships.

The IEEE Signal Processing Society is happy to provide up to US\$5,000 of support, on an application basis, to help offset the cost of these workshops and conferences, and we're accepting proposals for **Winter 2019-2020** Seasonal Schools now!

Proposals for Winter 2019-2020 Seasonal Schools are due **Friday, 3 May**, with final decisions announced in mid-July.

Questions about the SPS Seasonal Schools program? Visit the [Seasonal Schools page](#) on the Society website.

Upcoming Seasonal Schools in Signal Processing	
6-8 May 2019	2019 IEEE SPS Summer School on Digital Processing of Visual Signals and Applications - <i>Brazil</i> Website: TBA Registration Deadline: TBA
20-24 May 2019	2019 IEEE SPS Summer School on Network- and Data-driven Learning Fundamentals and Applications- <i>Lecce, Italy</i> Website: TBA Registration Deadline: TBA
14-31 July 2019	2019 IEEE SPS Summer School on Intelligent Signal and Information Processing - <i>China</i> Website: http://www.xian-summer-school.com Registration Deadline: TBA
9-13 September 2019	2019 IEEE SPS Summer School on Signal Processing – <i>Arenzano, Italy</i> Website: https://s3p2019.politecnica.unige.it/ Registration Deadline: TBA
